

**Complaints to NCR from employees and other external sources**  
**Operating and Non Operating Nuclear Reactors**  
**January 2007 - June 2015 (8.5 years)**

**Worst safety complaint records in the nation**  
**(reactors, state, number of reports)**

\*The Nuclear Regulatory Commission (NRC) refers to these complaints as "Allegations from External Sources" (all sources external to the NRC). Majority of complaints are from employees and other on-site sources. These are reports of impropriety or inadequacy of NRC-related safety or regulatory concerns. Includes all U.S. nuclear power reactors with safety allegations. Non-operational status noted with "D" = decommissioning or "N" = new. One allegation report may contain multiple allegations. However, the NRC counts it as one allegation in these statistics. A complaint about a safety-conscious work environment (SCWE) problem is important. However, a Notice of Violation is not issued, because there is no applicable NRC regulation.
