San Onofre - worst safety record of all 104 U.S. Reactors!

San Onofre - worst record of harassment and retaliation against employees reporting safety problems!
Complaints of Safety Problems at U.S. Nuclear Power Plants from All Sources External to the NRC*

January 2011 - October 2011

San Onofre - continues worst safety record of all 104 U.S. Reactors!

SAN ONOFRE Nuclear Power Plant vs. All Other U.S. Nuclear Power Plants

Complaints of Safety Problems from On-Site Employees & Contractors*

January 2007 - December 2010

*The Nuclear Regulatory Commission (NRC) refers to these complaints as "Allegations from On-Site Sources" (current/former power plant employees/contractors and anonymous allegers). These are reports of impropriety or inadequacy of NRC-related safety or regulatory concerns. This chart includes the number of on-site allegations filed with the NRC. However, each allegation may contain multiple complaints. The multiple complaint count is not included on this chart. Also, an allegation about a safety-conscious work environment (SCWE) problem at a facility is important. However, a Notice of Violation cannot be issued, because there is no applicable NRC regulation. Note: There are 64 nuclear power plants; the majority have more than one reactor for a total of 104 reactors in the U.S.
