

San Onofre or Diablo Canyon = Fukushima USA?

- Poor nuclear plant safety complaint record
- No safe emergency plan for California
- Toxic radiation in our ground, air and ocean
- Not ready for tsunami or 8.0+ earthquake
- Tons of toxic radioactive waste piling up
- Lower safety standards for old reactors
- No insurance for homes and businesses

We have plenty of power without San Onofre and Diablo Canyon nuclear reactors. Why are we taking these risks?

Japan: Fukushima Daiichi nuclear meltdown Mar 2011

Contact Governor Jerry Brown and your elected officials.

Demand our federal, state and local elected officials and the California Public Utilities Commission permanently replace San Onofre and Diablo Canyon nuclear power with existing non-nuclear surplus energy sources. Find contact information at
