

WHAT YOU CAN DO TO HELP MAKE US SAFE FROM NUCLEAR ACCIDENTS

CONTACT YOUR ELECTED OFFICIALS

Contact your state and federal elected officials: www.usa.gov/Contact/Elected.shtml

Contact your local city council.

- ☢ Tell them to represent your safety interests, not the money interests of the nuclear power industry.
- ☢ Demand the San Onofre nuclear reactors be shut down and all toxic nuclear waste removed until and if it can be proven safe by unbiased experts.
- ☢ Demand NRC safety regulations for new nuclear reactors apply to existing reactors. Demand NRC lessons learned from Fukushima be implemented now.
- ☢ Demand our elected officials follow the example of New York who shut down the Shoreham Nuclear Power Plant because it could not be safely evacuated in the event of a nuclear emergency. New York used ratepayer money to buy out the plant. We use ratepayer money to keep our plants running and to do “studies” that have not made us safer.
- ☢ Demand elected officials and the CPUC replace the approximately 5.5% of power consumed from San Onofre with **existing non-nuclear surplus energy sources**, and promote safer energy sources, energy conservation and energy efficiency. California law requires an increase to 33% renewable sources by 2020. Insist they do everything they can to accelerate this schedule.

PRACTICE ENERGY CONSERVATION AND ENERGY EFFICIENCY

- ☢ Energy efficiency can reduce U.S. electricity demand by almost 28% by 2025.
- ☢ Basic energy conservation alone can save at least 20% of the electricity we currently consume.
- ☢ Visit the California Energy Commission’s website for information on saving energy and to learn the facts about California nuclear power: www.energy.ca.gov

GET INVOLVED

- ☢ Share this information with friends, family and the media. It won’t happen without strong citizen support.
