What do we want?

**a LICENSE
AMENDMENT**

"We oppose Edison's proposed re-start of the defective Unit 2 at the San Onofre Nuclear Power Plant. We demand a full, transparent Adjudicatory Hearing and License Amendment process, including evidentiary hearings with sworn testimony and cross-examination which include experts independent of the NRC, Edison and the nuclear power industry. A public meeting is NOT a proxy nor substitute for this process. Given how we got to this point and the serious loss of faith by the public in the NRC and Edison as a result, we can see no reason why all 5 NRC Commissioners would not want this as well."

When do we want it?

NOW!
