Total (1505 W + 249 B)			1754						

B/W: W = welded lid thin-wall canister (~1/2" to 5/8" thick) B = bolted lid thick cask (~10" to 15" thick)

First Load: first year one or more canisters/casks loaded

Total: total canisters/casks loaded between 1st and Last Load dates for each model at storage facility

Assm/C: fuel assemblies per canister/cask

2016 Years: number of years earliest canisters/casks loaded as of 2016. Data as of 6/30/2013

Last Load: last year one or more canisters/casks loaded

***Humboldt Bay** thin canisters stored in bolted-lid Holtec transport casks in below ground

Sort: earliest date canister/cask loaded within each State

Source: DOE EIA inventory of commercial power reactor independent spent fuel storage installations (ISFSI) as of 6/30/2013
